

PRODUCER OF LIFTING SLINGS, ROPES, CORDS AND SHOE LACES

MANUFACTURING PROGRAM

■ ROUNDSLINGS

Modern textile lifting slings device with relatively light weight comparing to load capacity, considerate to all weights.

■ WEBBING SLINGS (FLAT)

Textile lifting slings are used throughout in industry for lifting, moving and hanging of weights thanks to it's effective properties.

■ CARGO LASHINGS

Cargo lashing are used for faster and easier security cargo on truck and thus allowing safe transport.

■ CHAIN LIFTING SLINGS

Suitable for weight lifting where use of textile or wire rope slings is not possible because of high temperature.

■ WIRE ROPE LIFTING SLINGS

Frequently are used grade 8 chain lifting slings. Moreover we can offer grade 10 and stainless chain lifting slings.

■ COMBINED LIFTING SLINGS

Special lifting slings combined from other types of lifting slings, used especially for heavy and very rugged cargos.

■ PROTECTIONS

Many time increases working life of lifting slings and protects both sling and weight against cut and abrasion.

MANUFACTURING PROGRAM

METAL COMPONENTS

Metal components and facilities grade 8, grade 10, and stainless are often used like supplement of lifting slings.

HOISTS, RACK JACKS

Hoists, rack and lever jacks, chain blocks and other accessories are used together with lifting slings for easier handling of load.

ROPES AND CORDS

Physical, mechanical and tensile parameters of ropes and cords depend on used material and cord design [twisted, braided].

SHOE LACES

Shoe laces are manufactured in many types, colour and length to be used in sports shoes, walking shoes, skates and children shoes.

TRAVERSE-BEAMS, CLAMPS, C-HOOKS

Lifting clamps construction grants you wide and safe application. Especially suitable for lifting of metal sheets and construction parts.

LIFTING MAGNETS

Small dimensions, low weight and great power makes lifting magnets device used in every metal material storage.

TWISTED ROPE LIFTING SLINGS

Traditional lifting slings manufactured since gothics for lifting of weights, also used at home as decoration.

PRODUCER OF LIFTING SLINGS, ROPES, CORDS AND SHOE LACES

The manipulation with cargo and its transport is always quite risky. It is an activity, which can cause damages to the property, but also can imperil health and in the last resort the life as well. Therefore, it is highly essential to prevent possible risks and not to make light of them. We do not make light of our customer's needs and of the quality of our marketed goods. We count among one of the best producers of complete range of lasher and manipulation technic, ropes, cords and shoe laces in the Czech Republic. We use certificate system of quality management in production according norm ISO 9001 and we are also holders of the series of product certificates, which we obtained from independent, national and also international certificate authorities and institutions. Our products are identical with European standard, which enables our products to be exported to the member states of European Union but also to non EU countries.

The preponderance segment of our production plan is targeted onto the sundry sorts of lashing products used for lifting, lowering, grabbing and manipulating with weight. Thanks to its variability and different utility features of individual categories, our products find the use across all industrial branches, in building industry, in agriculture etc. Safety lashing products are reliable means for securing safe transport of cargo not only for professionals, but also for general public clients. We offer these kits in different variations, which are able to secure almost all the sorts of transported weights. The next segment of our production plan is occupied by supplement range such as safety protectors, metal components, clamps, magnets and other products. These products make manipulating and transporting of cargo much easier and are compatible with all kinds of lashing products and securing sets. Cords, ropes and shoe laces are inseparable from our range as well. They are the products, which we come across with absolutely everywhere. Not only are they used in the industry but also in sport, rag trade and other branches. We produce cords, ropes and shoe laces of different materials, in wide range of colours and in innumerable variation of styles.
